

Futrend's Roadarmel earns award for services at General Accounting Branch

VIENNA, Va., May 6, 2011—Futrend Technology, Inc., employee Brian Roadarmel received the Green Visor award from our client the General Accounting Branch (GAB) under Office of Financial Management (OFM) at Program Support Center (PSC) at Department of Health and Human Services (DHHS). It was in recognition of his effort in ensuring that changes in IRS requirements for employee contributions to FICA were accurately paid. There were 16,000 invoices successfully processed in the production system in approximately 20 hours.

“The Green Visor is a monthly award to recognize GAB staff that provide contributions that exceed expectations for a specific task, so I am sure we will see more FUTREND staff being recognized in the near future,” Mr. Roadarmel said.

Brian Roadarmel:
“We will see more
FUTREND staff
being recognized in
the near future.”

Jerry Zhou, Chief Executive Officer of FUTREND, noted: “This is not the first time Brian and the Commercial Payment team received recognition from PSC and its customers. This is not only recognition of Brian’s tireless effort and excellent service, but also an honor bestowed to the entire team and all of FUTREND.”

The project required the GAB team to:

- Reconcile Health Resources and Services Administration (HRSA) payment records with PSC’s database,
- Provide the Division of Financial Operations’ (DFO) System Accounting Branch with the functional requirements to execute the Data Loader in conjunction with a recurring invoice in Oracle AP Module
- Execute the Data Loader in a test environment and production

Mr. Roadarmel expressed satisfaction in receiving the award. “I’m looking to stay in accounting/finance and I believe my accomplishments to date will allow me to leverage technology to provide process and efficiency improvement for current and future clients.”

Mr. Roadarmel, who joined FUTREND in October, 2010, attended Bloomsburg University of Pennsylvania, where he earned a Masters degree in Business and Information Technology and Systems (2010) and a Bachelor’s degree in Science in Business Economics (2008).
