

**Vienna, VA (July 19, 2010)** – National Institutes of Health’s Children’s Inn offers tens of thousands seriously ill children and their family a place to stay, the warm and comfort during times of difficulties in search of a cure. The Futrend Family came together to help support The Children’s Inn and its visitors. We ran a food drive, collecting basic necessities, which assist in the stocking of The Inn’s fridges and pantries. Thanks to those who donated to Futrend’s food drive and to those who volunteered their time and effort, Futrend raised approximately \$400 worth of canned goods and other nonperishable food items to aid The Children’s Inn and its focus.

### **About The National Institute of Health’s *The Children’s Inn***

Since its inception in June 1990, The Children’s Inn has had its doors open to its pediatric patients and their families. Creating a “home away from home” atmosphere for NIH patients, The Children’s Inn provides the warmth and attention of a nurturing environment to visiting families without the worry of stress or isolation of a hotel room stay. “During the past 20 years, 10,000 seriously ill children and their families have made 40,000 visits to The Inn.” Families come from all over the world for the benefit of medical research, and, in exchange for endless testings, IVs, and needles, The Children’s Inn offers around the clock comfort, assistance, and shelter.
